60 YEARS OF PASSION FOR WOOD.

— it’s a tree story.
BENEFICIAL ROOM CLIMATE

Genuine, open-pored solid wood brings comfort and warmth into your home. It breathes, absorbs humidity, and then releases it again when the air is dry. This creates a noticeably more pleasant atmosphere in the room. Wood also has a natural anti-static effect and doesn’t attract dust.

PURE SOLID WOOD

Our solid wood furniture makes for a healthy sleeping environment. That’s no surprise – after all, the trees come from healthy forests. First they grow for decades in sustainable forestry and then we prepare them with the greatest of care. We finish the wooden surfaces with pure natural oil. This retains all the beneficial characteristics of the wood for your home. The entire production process, from the tree to the finished furniture, is in our hands. So we can guarantee that the manufacture of our solid wood furniture is environmentally friendly.

You can find the TEAM footage video at www.team7-design.com and on YouTube.
QUALITY CRAFTSMANSHIP

We’ve been making furniture since 1959. You can feel this experience. Every piece of TEAM 7 furniture is unique: hand built in our workshop by experienced joiners using traditional Austrian artisan craftsmanship. It guarantees the high quality of our products. Just like our attention to detail, for example when we assemble the fronts of our furniture by hand during “painting with wood”.

durable and of lasting value

We create not only furniture, but also values. Robust and durable wood ensures that our furniture has a long life span. It therefore retains its expressiveness over the years and gains in value. No other material ages quite as gracefully as genuine solid wood.

3-layer technology

In our board factory we produce high-quality 3-layer boards that are extremely stable. This technology opens up unique possibilities for design and function.

DESIGN AND INNOVATION

We believe that sustainability begins with the design process. After all, people only want to hold on to things which bring them lasting enjoyment. That’s why our bedroom furniture has a timeless beauty. Metal-free wooden jointing in our beds and high-quality wooden sleeping system made of all-natural materials.

frameworks for our wardrobes guarantee optimum stability and many years of use – no matter how often you move house. And in order for you to enjoy your bed night after night, we’ve developed the ergonomically designed sleeping system made of all-natural materials.
INDIVIDUALLY PLANNED

Our consultants plan your bedroom according to your ideas and available space. Every single piece of furniture is designed in accordance with your wishes and perfectly reflects your individual needs. This means that you can choose from various bed models, matching occasional furniture and versatile cabinets. Numerous types of wood, as well as different materials and colours offer you plenty of freedom in the design.

What’s your favourite colour?

Choose the exact colour you desire for all glass surfaces. The entire colour range of the NCS colours is available to you (surcharge applies).

CUSTOM MADE

Our furniture is not produced for a warehouse, it is created in response to customer requests. Manufacturing exclusively made to order means we have maximum flexibility to realise your dream living space. A wide range of designs for beds, occasional furniture and wardrobes, with the option to adjust heights, widths and depths* to your requirements means we can plan the layout individually for you – or even design specially for you.

*Size reductions only possible for certain models. More information is available from your TEAM 7 dealer.
THE NATURAL BED: HEALTHY SLEEP FROM A TO ZZZZ.

— it’s a tree story.

Although we build furniture, we believe comfortable sleep goes far beyond just a good bed. We know how important it is to regenerate every night. That’s why we make sure you have everything you need for healthy sleep, metal-free solid wood beds, the ergonomic AOS sleeping system, and high-quality pillows and duvets.

solid wood bed

We guarantee that there’s one thing you won’t find in any of our bed connections: metal. This is how we prevent the amplification of existing magnetic fields.

aos sleeping system

Our AOS sleeping system gives you everything you need for comfortable sleep: the perfect support for your spine, optimal ventilation, and natural materials.

sleep accessories

The finishing touch for your sleeping pleasure: customisable pillows for proper reclining and blankets made of natural materials for a perfect sleeping climate.

You can find the video about our AOS sleeping system at www.team7-design.com and on YouTube.
NATURAL MATERIALS

Wood, glass, leather, fabric, natural latex, cotton, sheep’s wool, and TENCEL®/maize fibre: it’s important to us that the materials used in our bedroom furniture, both in the internal elements of the beds and in the accessories, are natural and provide a sleeping environment that is free from harmful substances, while also offering optimal support for your nightly regeneration. As a result you’ll be able to sleep healthily and in harmony with nature.

The ultimate natural sleeping pleasure is offered by our float bed, where even the upholstery of the headboard is made of natural coconut fibre.

pure solid wood

Pure solid wood affects the quality of your living environment more than almost any other material. Its positive features are revealed particularly in the bedroom. To preserve them, we finish the wooden surfaces of our furniture exclusively with pure natural oil, which allows the wood to remain porous and breathable. It’s free of pollutants, has antibacterial and antistatic effects. Genuine wood has a soothing influence on our subjective perception. Even the smell alone conjures up positive feelings. The essential oils of various wood types, such as Swiss pine, play a key role when it comes to the quality of the regeneration phases – particularly during the important hours of the night.

The warm, gentle feel of the open-pore wooden surfaces also evokes a sense of well-being and relaxation. And this means building up your strength and energy.

leather

Leather is a treated animal skin, and is therefore a natural material with all its associated natural characteristics. These characteristics attest to the product’s authenticity and give the soft, breathable material a unique look.

fabric

Our fabrics are mostly made of natural materials. Depending on the fabric collection, this may be pure sheep’s wool, a fibre which is obtained from sheep’s fleece, or viscose, a cellulose fibre obtained from wood.

glass

Glass is made from natural and nature-identical raw materials. Glass itself is also an important raw material when it comes to glass production. Because glass is 100% recyclable, it can be melted down and reworked, over and over again.

coconut fibre

Coconut fibre is a purely plant-based padding material. It is derived from the coconut’s outer shell and characterised by its low weight and high elasticity. Breathable and moisture-resistant, it helps to keep a dry sleeping climate.
float bed

wood type walnut, tartufo natural leather
Our *float* bed, when combined with high mattresses, offers a typical appearance for box spring beds with a high sitting edge, and yet at the same time fascinates with its unique visual impression of lightness. The high-quality stitching of the leather headboard emphasises the elegance of the bed.

100% natural, a filling made of latex-coated coconut fibres and cotton fleece provides natural padding for the headboard

100% handcrafted, high-quality padding and stable corner joints made of solid wood
Sleeping becomes a new experience with *float*. Made of solid natural wood, it retains its unique sense of lightness even in combination with a thick mattress.

Kai Stania, designer

---

**float**

As though it were growing like a tree, the bed frame seems to transition seamlessly into the wooden headboard. The base headboard looks just as refined and is almost the same height as the foot of the bed.

1 fig. above: *float* bed with wooden headboard, 180 × 200 cm, wood type oak, black-brown leather upholstery; *float* bedside cabinet, wood type oak, matt medium grey glass

---

**float**

Clear lines between bed and headboard. A fine groove divides the bed frame of the *float* bed and makes it appear delicate.

A deep seam, the distinctive design of the fabric headboard, draws on the elegant lines.

1 fig. *float* bed with fabric headboard, 180 × 200 cm, wood type oak, Canvas 134 fabric; *float* bedside cabinet floating freely with glass; 60 × 9.7 × 35.6 cm (w × h × d), wood type oak, matt medium grey glass
**float**

In every detail, the design of the *float* bedside cabinet is perfectly coordinated with the *float* bed. The front height corresponds precisely either to half, or the entire height of the bedsides – depending on the choice of the drawer size. Even the harmonic round curves of the bed corners are reflected in the bedside cabinets.

fig. above: *float* bedside cabinet with slide and wood top, 60 × 46.5 × 42 cm (w × h × d), wood type walnut
fig. left: *float* bedside cabinet, floating freely with a large drawer and wood top, 60 × 19.1 × 35.6 cm (w × h × d), wood type walnut

**loup**

*loup* is a real all-rounder and fits wonderfully in all living areas. The core design element consists of two rings and is connected by a vertical bar. The table top insert can be selected in leather or coloured glass.

fig. right: *loup* side table, wood type oak, black-brown leather | wood type oak

**float**

The *float* bedside cabinet can be mounted on the wall with an elegant solid wood slide or free floating. The base of the stand-alone version offers an additional storage surface.

fig. left: *float* bedside cabinet with two slides, one drawer and wood top, 60 × 46.5 × 42 cm (w × h × d), wood type oak

**float**

...
wardrobe system

Our custom-made wardrobes, built from pure solid wood, are perfectly fitted to suit your personal needs. With an extensive and functional interior, our wardrobes offer perfect comfort and the best possible overview of your clothing.

fig. above and right: open wardrobe, wood type walnut

flexible interior, drawers with variable partitioning
loving details, stylish handles made from genuine leather
Precise proportions and recessed slides give the impression that the *riletto* bed is floating. The optional stylish consoles can be equipped with a practical drawer if desired. Keep everything close at hand for a naturally beautiful start to the day with the *riletto* make-up table.

**riletto**

fig. left page *riletto* bed with consoles, 180 × 200 cm, wood type oak white oil, white leather

fig. above *riletto* console with drawer and mirror, 135 × 100.8 × 45.8 cm (w × h × d), wood type oak white oil, white leather, matt aluminum frame

fig. left *riletto* console, wood type oak white oil
The harmonious interplay of solid wood and leather is characteristic of the entire *riletto* line. The leather-covered sides of the *riletto* bed are matched by leather sides on the cabinets and dressers, creating a wonderful contrast to the wood.

Artisan craftsmanship with lovingly finished details and a beautifully light, floating appearance define the exceptionally elegant style of the *riletto* bed.

Kai Stania, designer
The relief wardrobe is a masterpiece of craftsmanship – both inside and out. On the inside it’s clearly structured by practical organisation aids. When it’s closed, it makes an utterly vivacious impression with its fascinating material mix of glass and wood. The millings diagonal to the grain emphasise the integrity of the wood, inner lighting, light strips on the doors for perfect illumination.
nox bed | wood type: oak, taupe leather
"A bed with style as uncompromising as the night is dark: solid wood, harmonious design lines revealing beautiful structural details, with a neat, comfortably upholstered headboard, and an impression of floating in the air. Done!

Jacob Strobel, designer

Thick solid wood panels with delicately rounded edges, and corner joints that combine to form the elegant S-line characterise the nox bed and occasional furniture. The nox bed upholstered leather headboard proves to be particularly convenient due to its comfortable backrest, enabling you to read in bed. The headboard is also available in solid wood if you prefer.

Fig. above: nox dresser, 137.2 × 71.5 × 48.2 cm (w × h × d), wood type wild walnut
Fig. left above: nox bed with upholstered headboard, 180 × 200 cm, wood type wild oak, dark brown leather block of solid wood, smoked oak
Fig. left below: nox bed with wooden headboard, 180 × 200 cm, wood type wild walnut, nox bedside cabinet, 41.2 × 39.5 × 41.8 cm (w × h × d), wood type wild walnut
Swiss pine is known as the “queen of the alps,” and has a delightful scent which soothes the senses. Its precious, essential oils have a relaxing effect. Swiss pine enhances sleep quality, helps reduce heart rate, accelerates recovery of the autonomic nervous system during sleep, and thus improves overall well-being.
At the centre of the nox wardrobe is a large sliding door made of solid wood with an impressive material thickness. It can be moved smoothly in both directions and comes softly to rest in the centre.

fig. nox wardrobe, 290 × 260 × 66.8 cm (w × h × d), wood type wild oak, interior wood type beech, matt white glass
**mylon**

The sophisticated interaction of different materials gives our mylon bed its attractively slim appearance. The mylon bench is the perfect complement – useful as a seat or a place to put things. Under the soft-close lid there is a practical storage space. The console is simple to install and offers a flexible alternative to the classic bedside cabinet.

**mylon**

The mylon bed and occasional furniture are made of solid wood, to ensure the environment in your bedroom stays healthy. And they look great together, too. The mylon bedside cabinet and dressers have elegantly slender legs and neat curves, like the bed itself.

**mylon**

Fig. above: mylon bed, 180 × 200 cm, wood type oak, Maple 722 fabric. mylon bedside cabinet with drawer, 49.8 × 39.5 × 37.4 cm (w × h × d), wood type oak

Fig. above: mylon bench, 180.4 cm, wood type oak, Maple 722 fabric

Fig. right: console, 44 × 30 cm, wood type oak

Fig. below: mylon bedside cabinet, 49.8 × 39.5 × 37.4 cm (w × h × d), wood type oak

Fig. above left: mylon dresser, 134.8 × 87.5 × 43.8 cm (w × h × d), wood type oak

Fig. above right: mylon dresser, 84.8 × 119.5 × 43.8 cm (w × h × d), wood type oak

Fig. below left: mylon bedside cabinet, 49.8 × 39.5 × 37.4 cm (w × h × d), wood type oak

Fig. below right: mylon bedside cabinet with drawer, 49.8 × 39.5 × 37.4 cm (w × h × d), wood type oak

"mylon is defined by a combination of strong, straight lines and precise curves in its details. This concept is characteristic of all the furniture in the mylon family."

Jacob Strobel, designer
Design your mylon bed however you like! For example, with the elegant slat headboard and the optional footboard. As an alternative to leather or fabric, you can also design your mylon bed with sides made of pure solid wood.

Fig. right: mylon bed with slat headboard and wooden bedside, 180 × 200 cm, wood type oak,
lunetto

You can recognise the lunetto hinged door wardrobe by its characteristic horizontal wood grain. And like all TEAM 7 wardrobes, the lunetto wardrobe is also always custom made – perfectly tailored to your needs.

fig. above and right: lunetto wardrobe, 322 × 227.2 × 63.9 cm (w × h × d), wood type oak, interior wood type beech, matt white glass

the feel of nature, elegantly angled handle made of solid wood
everything in order, concise and high-quality interior fittings
Genuine solid wood also makes the interior of our wardrobes a real eye catcher. An optional high-quality LED-lighting system ensures the right lighting. Wooden shelves used to connect individual wardrobe cubicles offer open storage space for decorative accessories and bring comfort to your bedroom.

fig. lunetto wardrobe, 322 × 227.2 × 63.9 cm (w × h × d), wood type oak, interior wood type beech, matt white glass
The delicate material thickness allows the lunetto bed to appear particularly light, while traditional wooden joints provide maximum stability. You can choose between solid wood and relief for the headboard.

fig. left: lunetto bed with wooden headboard, 180 × 200 cm, wood type beech heartwood
fig. above: lunetto bed with wooden headboard, 180 × 200 cm, wood type oak; lunetto bedside cabinet, 91.2 × 39.5 × 42 cm (w × h × d), wood type oak

valore

Whether with hinged or sliding doors: The valore wardrobe provides adequate storage space. Same as the practical interior, there are many options for the exterior. Choose doors in solid wood, coloured glass, or in a combination of both.
Whether it’s standing on the floor, mounted, or leaning casually against the wall – our haiku mirror always looks stylish. The expandable arms and convenient hanging points on our hood clothes rack offer plenty of room for your clothing. Big brother hood+ is even more generous – available in either 110 or 130 cm widths.

bed interiors
NATURALLY HEALTHY SLEEP ENVIRONMENT

At night we recharge our energy and strength for the next day. This is the time for our brains to process the impressions of the day. The immune system winds down at the same time, which makes our bodies more susceptible to outside influences. That is why a healthy and restful sleep environment is the be-all and end-all for us humans. It is clear to us that only natural materials and the perfect interaction of bed, interior and accessories offer optimal sleeping pleasure.

pure solid wood
Genuine, open-pore solid wood plays a key role in the bedroom. The pleasant smell and warm feel is enough to evoke a sense of well-being and relaxation in us humans.

natural latex
The material produced from the latex sap of the rubber tree is impressive due to its excellent point elasticity and breathability. Its continuously high adaptability makes natural latex an ideal choice for optimal spine support in any sleeping position – for many years.

cotton
Cotton, derived from the seed fibres of the cotton plant, is by nature a resilient, durable fibre. It is extremely skin-friendly and soft. It also balances temperatures by releasing excess heat to the outside.

sheep’s wool
Sheep’s wool is a natural product made from sheep’s fleece. It can absorb up to 33% of its own weight in moisture without feeling damp, providing a healthy and dry sleeping climate. In addition, it’s also naturally self-cleaning.

TECE®/maize fibre
TECE® is made from the cellulose of beech trees. It absorbs moisture and then quickly releases it again, creating a comfortable sleeping environment. Maize fibre has a heat-insulating effect, and high bulking power. Both fibres are washable and well-suited for people with allergies.
AOS – THE ART OF SLEEP

Our holistic, ergonomically designed aos sleeping system adapts to your individual needs and your sleeping position. It is the ideal complement for our solid wood beds and consists of a fitted frame, spring element, mattress, and slip cover or under-bedding. The individual components are made of natural and renewable resources: wood, natural latex, cotton, sheep’s wool, TENCEL® and maize fibre.

mattress
The aos mattress consists of 100% natural latex derived from the sap of the rubber tree.
height: 10 cm | 15 cm

spring element
The aos spring element has an intelligent construction that adjusts to various sleeping positions. It ensures that the pressure is properly distributed and provides the best possible support for your spine.
height: 12 cm

total height: 26 cm
(with a mattress height of 10 cm)

slip cover
The aos slip cover is made of natural materials and combines the spring element and mattress into a compact unit.

fitted frame
Just like the rest of the sleeping system, the aos fitted frame creates a stable base and is 100% metal-free. Alternatively, you can select either a manually or an electrically adjustable fitted frame.
height: 6 cm | 8 cm

You can find the video about our aos sleeping system at www.team7-design.com and on YouTube.
HEALTHY SLEEP

Our aos sleeping system has undergone extensive emissions and pollutant tests to check for any health risks. As a result of these tests, it has been awarded the eco-INSTITUTE label. This quality seal indicates products that support a healthy living environment that is free from harmful substances. So for everyone whose one wish is a good night’s sleep: it will be a very good one with aos.

mattress

Our aos mattress only yields where a force is applied. This ensures optimised pressure relief and ideal blood circulation. It is made of 100% natural latex and is available in two levels of firmness, soft and hard, as well as in two height options, 10 or 15 cm. It is attached to the aos spring element with a zipper.

fitted frame

The aos fitted frame is available in either spruce or Swiss pine. The manually-adjustable fitted frame also in beech offers seven inclines for the head and three for the feet area. The electric fitted frame’s adjustment is unrestricted.

slip cover

The removable upper part of the slip cover is made of 100% pure cotton (certified organic cotton), quilted with self-cleaning sheep’s wool. Of course you can also opt for the washable, hypoallergenic version made of TENCEL®/maize. Alternatively, there is the aos sleeping system with an under-bedding made of sheep’s wool or TENCEL®. A partner cover is available for both versions.

spring element

Seven latex strips covered in cotton, with sophisticated structural positioning, and rimellas made of elastic ash ensure precise support for your body – whether you’re lying on your back, stomach, or side. The rimellas can be separately removed and adjusted to customise the sleeping system. Their ribbed surface and construction from individual components provide the optimal ventilation of the spring element.

topper

The optional aos topper made from premium talalay latex provides additional comfort. Together with the 15 cm thick mattress, it makes the aos sleeping system feel like a box-spring. The higher seating edge makes it easier to get in and out of bed. The aos topper is also available as a partner cover in a width of up to 200 cm.
MATTRESSES

Seven zones, subdivided into the shoulder, pelvis, and foot areas, provide our classic mattresses with pressure relief that precisely conforms to your body contours, thus creating ergonomically healthy sleeping comfort. High-quality cotton covers quilted with TENCEL®/maize fibre promote a good moisture balance and pleasant sleeping climate.

SLATTED FRAMES AND SLAT BASES

Combined with our slatted frames and slat bases, our classic mattresses offer superior comfort. With fifty three-dimensional, independent plates made of beech mounted on spring slats, the classic flex plate frame optimally conforms to the contours of the sleeper’s body. Zones specially designed to support shoulders and heels as well as additional inserts to adjust firmness for the lumbar region enable individual settings. Our classic slatted frame is also very flexible, thanks to the 28 movable spring slats. It is available with fixed or with manually adjustable head and foot elements.

ACCESSORIES

Your sleep climate has a considerable influence on how restful your sleep is: if it is too warm or cold your body has to react and balance out the temperature. This impairs regeneration. That’s why we make sure that our covers are made of particularly climate- and moisture-regulating materials. Your sleeping pleasure is ensured with our pillows, which support an ergonomically correct lying position.

WE ARE DEDICATED TO CREATING FURNITURE THAT’S JUST AS UNIQUE AS WOOD ITSELF.

It’s a tree story.

**simple day-to-day care**

Our solid wood furniture is not only pleasant to the touch—it also holds up well with daily use. Day-to-day cleaning just needs a dry or slightly damp cotton cloth.

**product care and repair**

The open-pore finish of our wooden surfaces means that even small dents or scratches can be easily treated. Even the traces of many years of use can be removed: sand it down, apply oil, and you’re done. By the way, the solid wood furniture feels most comfortable at a constant humidity level of between 40% and 60%, and a room temperature of between 18° and 23° Celsius—just like us humans.

**conservation of resources**

Shopping with the right attitude. Contrary to the current trends toward global sourcing, we have always relied on regional partners and suppliers. This ensures short transport routes and avoids unnecessary emissions of harmful substances. Plus, our regional, carefully selected supplier network means more flexibility for our customers. This not only protects nature, it also preserves our independence.

**ecolabel**

The Austrian ecolabel shows that the wood we use comes from sustainable forestry and contributes to a healthy sleeping environment due to its special surface treatment. It is also a mark of high-quality products that excel in durability, serviceability, and safety and comfort in daily use.

**ISO, EMAS**

The EMAS certificate is proof of our sustainable production, efficient use of resources, and the fact that we comply with the applicable environmental laws. As an ISO-certified company, we stand for the implementation of internationally applicable standards in the areas of environment, quality, and safety.

**test lab**

Starting in the development phase, we test the function, ergonomics, stability, and safety of our products comprehensively in our own laboratory, over thousands of cycles. Thus, by choosing TEAM 7, you buy only custom-made furniture with perfected technology and function.

**supply chain**

From the tree to the finished product: it’s in our hands.

Every order custom made in our own workshops in Austria.
